

Date: February 19th, 2018

Time: 12PM-1PM

Meeting 2

Meeting Attendance: Nick LaGrassa, Ayoola Obi, Aditya Kishan Ankaraboyana

- Yooil home sick

Meeting Summary:

Reviewed existing front end code:

- Went through how React compartmentalizes components.
- Discussed issue of nesting components and functions within components in React
- Debugged main video sliding across screen to the left
- Added line to make main-screen video compatible with Safari
- Decid

Met with new TA Dave

- Answered questions regarding design and implementation choices.
- Listened to announcements regarding what to do about team members who do not pull their weight.
- Listened to pitfalls of Dave's team last year
- Asked questions about Node and communications between front and back end apps

Action Items for next meeting:

- Yooil: Improve aesthetics of welcome page (CSS). Make sure user knows the precise function of the app when they access the welcome page.
- Kishan: Have icons show up on welcome page. Add functionality so when icons are clicked, show text that has song and artist names.
- Obi: Set up Express and have backend app running.
- Nick: Get familiar with Node and Mern stack. Set up database to store and return prototype data. Complete and submit meeting minutes.
